

TECHNICAL DATA

WATERSTAIN[®] Series

DESCRIPTION

Blend of natural and synthetic waxes in water emulsion, containing dyestuffs with high penetration and dyeing power.

WATERSTAIN[®] series are special water-based fluid waxes for crust dyeing and finishing.

The aniline effect which can be obtained is typical of veg-tanned "Tuscany" articles.

WATERSTAIN[®] may be manually applied by sponge or pad directly on the leather to obtain uniform or cloudy effect.

They can be applied also with roller-coater granting a more uniform effect.

The leathers can be finished with the sealing creams of VICTORIA CREME[®] Series.

Leathers finished with WATERSTAIN[®] have good dry/wet rub resistances and high water-drop fastness.

PHYSICAL CONSTANTS

□ Referred to neutral base

		Standard Value	Test Method
Appearance	:	neutral fluid	MDA 008
Dry Content(%)	:	9 ± 1	MDA 010/011
Density (g/cm ³)	:	0.966 ± 0.05	MDA 018

The coloured versions could have slightly different values.

STORAGE

Non-dangerous product (with the exception of some colours which are inflammable). Store between +5/40° C.

MINIMUM SHELF-LIFE

The product is guaranteed for its physical and quality characteristics for at least 24 months from the date of production. It has to be kept in its original drum, well sealed and stored, following the conditions in our technical data.
